

ACTIVITY REPORT OF STUDENT MENTORING SYSTEM 2020-2021

Main responsibilities:

1. Mentor students on academics, provide career guidance, help in personal development, help mould and shape their goals.
2. Encourage good rapport with students.
3. Work in cooperation with Academic Committee.

Report:

1. The mentoring system has been functioning well but not in full swing due to Covid-19 pandemic since there was no regular offline class during the academic session 2020-2021.
2. It includes only I Semester students. The Professors have been handed the charge of mentoring the students.
3. Professors from different departments have been assigned with the task of mentoring students from their respective core students as well as other departments since the number of students cannot be equally divided in cases where there are large numbers of students in a particular subject. The core students from the V Semester are monitored by the professors of their respective departments.
4. Each mentor has been provided with a mentoring record book wherein they will enter the names, phone numbers, parents' details and addresses of their mentees and different datas collected from the students relating to academics or problems that the students might be facing. In some cases, the students are also given guidance and counseling regarding their future careers.
